(An Autonomous Institution affiliated to Rashtrasant Tukadoji Maharaj Nagpur University)

Hingna Road, Wanadongri, Nagpur - 441 110

NAAC A++

Ph.: 07104-237919, 234623, 329249, 329250 Fax: 07104-232376, Website: www.ycce.edu

Department of Computer Technology

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027(ODD)

Vision: Dream of where you want.	Mission: Means to achieve Vision
---	---

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	Preparation	P: Preparation	Pep-CL abbreviation pronounce as Pep-si-IL easy to recall
PEO2	Core Competence	E: Environment (Learning Environment)	
PEO3	Breadth	P: Professionalism	
PEO4	Professionalism	C: Core Competence	
PEO5	Learning Environment	L: Breadth (Learning in diverse areas)	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:

Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

“I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life.” to contribute to the development of cutting-edge technologies and Research.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Session	2026-27 (ODD)	Course Name	LAB: Software Engineering
Semester	7 th	Course Code	23CT1704
Roll No	25	Name of Student	Tanushri Sawalikar

Practical Number	07
Aim	To study and draw UML State Diagram for the given case study of an E-Learning Platform.
Theory (100 words)	A UML State Diagram represents the different states of an object or system and the transitions between those states. A state describes a condition of an object at a particular time, while a transition represents a change from one state to another due to an event or action. For the E-Learning Platform, the student interaction can be represented through states such as Registration, Login, Course Enrollment, Learning Material, Assessment, Payment, Result, and Certificate. The State Diagram shows how the student moves from one state to another during the learning process. It helps in understanding the dynamic behavior of the E-Learning Platform.
Procedure and Execution (100 Words)	Algorithm(Steps): Step 1: Start. Step 2: Identify the E-Learning Platform case study. Step 3: Identify the main states: • Registration • Login • Course Enrollment • Learning Material • Assessment • Payment • Result • Certificate Step 4: Create the initial state. Step 5: Connect the initial state to Registration . Step 6: Connect Registration to Login . Step 7: After successful login, move to Course Enrollment . Step 8: After course enrollment, move to Learning Material .

	Step 9: After accessing the learning material, move to Assessment . Step 10: After assessment, move to Payment . Step 11: After successful payment, move to Result . Step 12: After the result is generated, move to Certificate . Step 13: Connect Certificate to the final state. Step 14: Save the completed State Diagram. Step 15: Stop.
	Code: StarUML
	Output:

Department of Computer Technology

	UML State Diagram – E-Learning Platform  <pre> stateDiagram-v2 [*] --> Start Start --> Registration: state Registration { entry / enter details do / validate information exit / save user } Registration --> Login: Registration Successful state Login { entry / enter credentials do / verify user exit / create session } Login --> CourseEnrollment: Login Successful state CourseEnrollment { entry / select course do / check eligibility exit / enroll in course } CourseEnrollment --> LearningMaterial: Course Enrolled state LearningMaterial { entry / view material do / read / watch content exit / mark as completed } LearningMaterial --> Assessment: Material Accessed state Assessment { entry / start quiz/assignment do / submit answers exit / evaluate } Assessment --> Payment: Assessment Completed state Payment { entry / select payment method do / process payment exit / generate receipt } Payment --> Result: Payment Successful state Result { entry / calculate result do / update grade exit / show result } Result --> Certificate: Result Generated state Certificate { entry / generate certificate do / issue certificate exit / notify student } Certificate --> End: View / Download Certificate End --> [*] Login --> Registration: Login Failed CourseEnrollment --> LearningMaterial: Enrollment Failed Payment --> Result: Payment Failed </pre>
Output Analysis	The UML State Diagram represents the dynamic behavior of the E-Learning Platform from the student's point of view. The process begins with Registration and moves to Login after successful registration. After login, the student proceeds to Course Enrollment, accesses Learning Material, and completes the Assessment. The process then moves to Payment, followed by Result generation and Certificate generation. The diagram clearly represents the sequence of states and transitions involved in the

Conclusion	The UML State Diagram for the was successfully studied and drawn. The diagram represents the different states of the student learning process, beginning with registration and login and continuing through course enrollment, learning material, assessment, payment, result, and certificate generation. The State Diagram provides a clear representation of the dynamic behavior and sequence of activities in the E-Learning Platform.
Plag Report (Similarity index < 12%)	 The screenshot shows a plagiarism checker interface with tabs for 'Plagiarism Checker', 'Check Grammar', and 'AI Detector'. The 'Plagiarism Checker' tab is active, displaying 'Scan Properties' with 0 sources found, 208 words, and 2019 characters. It also shows a 'View More Details' button. On the right, there are three circular progress indicators: 'Plagiarism 0%', 'Exact Match 0%', and 'Partial Match 0%'. A large green circle on the far right indicates 'Unique 100%'. A 'Pro' badge is visible in the top right corner of the interface.
