

**Department of Computer Technology****Vision of the Department**

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027(ODD)

Vision: Dream of where you want.	Mission: Means to achieve Vision
---	---

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	Preparation	P: Preparation	Pep-CL abbreviation pronounce as Pep-si-IL easy to recall
PEO2	Core Competence	E: Environment (Learning Environment)	
PEO3	Breadth	P: Professionalism	
PEO4	Professionalism	C: Core Competence	
PEO5	Learning Environment	L: Breadth (Learning in diverse areas)	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:

Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

“I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life.” to contribute to the development of cutting-edge technologies and Research.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Name and Signature of Student and Date

Department of Computer Technology

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Session	2026-27 (ODD)	Course Name	LAB: Software Engineering
Semester	7 th	Course Code	23CT1704
Roll No	25	Name of Student	Tanushri Sawalikar

Practical Number	04
Aim	To study and draw UML Use Case Diagram for the given case study of an E-Learning Platform.
Theory (100 words)	A UML Use Case Diagram represents the functional requirements of a system and shows how external actors interact with the system. It consists of actors, use cases, a system boundary, and relationships. In the E-Learning Platform, the main actors are Student, Instructor, Administrator, and Payment. The major use cases are Manage Users (Registration and Login), Manage Courses and Learning Material, Manage Assessment and Quizzes, and Report, Results and Certificates. Students provide registration/login details and receive course materials, results, and certificates. Instructors provide course and faculty information and receive student performance reports. Administrators manage users, courses, and the system, while Payment provides payment details and receives payment responses.
Procedure and Execution (100 Words)	Algorithm(Steps): Step 1: Start. Step 2: Identify the system as E-Learning Platform. Step 3: Identify the actors: • Student • Instructor • Administrator • Payment Step 4: Identify the main use cases: • Manage Users (Registration and Login) • Manage Courses and Learning Material • Manage Assessment and Quizzes • Report, Results and Certificates Step 5: Place the actors outside the system boundary. Step 6: Place the use cases inside the E-Learning Platform system boundary. Step 7: Connect Student with: • Manage Users (Registration and Login) • Manage Courses and Learning Material • Report, Results and Certificates

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Step 8: Connect Instructor with:

- Manage Courses and Learning Material
- Manage Assessment and Quizzes
- Report, Results and Certificates

Step 9: Connect Administrator with:

- Manage Users (Registration and Login)

Step 10: Connect Payment with:

- Manage Users (Registration and Login)

Step 11: Verify all actor-use case relationships.

Step 12: Stop.

Output
Analysis

The UML Use Case Diagram represents the interaction between the Student, Instructor, Administrator, and Payment actors and the E-Learning Platform. The Student interacts with the system through registration/login, course enrollment, course materials, results, and certificates. The Instructor provides course information, course materials, faculty information, certification, and result/report information. The Administrator manages users, courses, and the system. Payment provides payment details. The major system functions are Manage Users (Registration and Login), Manage Courses and Learning Material, Manage Assessment and Quizzes, and Report, Results and

Conclusion	I have successfully understand the study and draw UML Use Case Diagram for the given case study of an E-Learning Platform.
Plag Report (Similarity index < 12%)	 The screenshot shows a plagiarism checker interface with tabs for 'Plagiarism Checker', 'Check Grammar', and 'AI Detector'. The 'Plagiarism Checker' tab is active. On the left, 'Scan Properties' show 0 sources found, 208 words, and 2019 characters. On the right, a circular progress indicator shows 'Plagiarism 0%' with sub-categories for 'Exact Match' (0%) and 'Partial Match' (0%). A green circle indicates 'Unique 100%'. A 'View More Details' button is at the bottom left of the scan properties.
