

Department of Computer Technology

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027(ODD)

Vision: Dream of where you want.	Mission: Means to achieve Vision
---	---

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	Preparation	P: Preparation	Pep-CL abbreviation pronounce as Pep-si-IL easy to recall
PEO2	Core Competence	E: Environment (Learning Environment)	
PEO3	Breadth	P: Professionalism	
PEO4	Professionalism	C: Core Competence	
PEO5	Learning Environment	L: Breadth (Learning in diverse areas)	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:

Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

“I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life.” to contribute to the development of cutting-edge technologies and Research.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Name and Signature of Student and Date

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Session	2026-27 (ODD)	Course Name	LAB: Software Engineering
Semester	7 th	Course Code	23CT1704
Roll No	25	Name of Student	Tanushri Sawalikar

Practical Number	05
Aim	To study and draw UML Class diagram for the given case study of an E-Learning Platform.
Theory (100 words)	A UML Class Diagram is a structural diagram that represents the static structure of a system. It shows classes, their attributes, operations, and relationships. A class represents an entity of the system, attributes describe its properties, and operations define the functions performed by the class. Relationships describe how different classes are connected. Based on the E-Learning Platform case study, the main classes are Student, Instructor, Administrator, Course, Learning Material, Assessment and Quizzes, Payment, Result, and Certificate. The Class Diagram provides a clear structural view of the system and helps developers understand how different parts of the E-Learning Platform are related.
Procedure and Execution (100 Words)	Algorithm(Steps): Step 1: Start. Step 2: Identify the system as the E-Learning Platform . Step 3: Identify the main classes: • Student • Instructor • Administrator • Course • Learning Material • Assessment and Quizzes • Payment • Result • Certificate Step 4: Add attributes and operations to each class. Step 5: Establish relationships between the classes. Step 6: Add multiplicities wherever required. Step 7: Draw the classes using UML class notation. Step 8: Connect the classes using appropriate associations. Step 9: Verify the Class Diagram with the previously designed Level 0, Level 1 DFD, and Use Case Diagram.

Department of Computer Technology

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

	Step 10: Save the completed diagram. Step 11: Stop. Code: Tool Used: StarUML Output: 
Output Analysis	The UML Class Diagram represents the static structure of the E-Learning Platform. It identifies the main classes involved in registration, course management, learning materials, assessments, payments, results, and certificates. The Student class interacts with courses, learning materials, assessments, payments, results, and certificates. The Instructor manages courses, learning materials, and assessments, while the Administrator manages users, instructors, courses, and the system. The diagram provides a structured view of the classes and their relationships and is consistent with the functions represented in the Level 0 and Level 1 DFDs and the Use Case Diagram.
