

Department of Computer Technology

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027(ODD)

Vision: Dream of where you want.	Mission: Means to achieve Vision
---	---

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	Preparation	P: Preparation	Pep-CL abbreviation pronounce as Pep-si-IL easy to recall
PEO2	Core Competence	E: Environment (Learning Environment)	
PEO3	Breadth	P: Professionalism	
PEO4	Professionalism	C: Core Competence	
PEO5	Learning Environment	L: Breadth (Learning in diverse areas)	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:

Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

“I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life.” to contribute to the development of cutting-edge technologies and Research.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

Session	2026-27 (ODD)	Course Name	LAB: Software Engineering
Semester	7 th	Course Code	23CT1704
Roll No	25	Name of Student	Tanushri Sawalikar

Practical Number	06
Aim	To study and draw UML Package diagram for given case study of an E-Learning Platform.
Theory (100 words)	A UML Package Diagram is a structural diagram used to organize related classes and elements of a system into packages. A package groups elements that belong to a particular functionality or module. It helps to represent the high-level organization of a software system and the dependencies between different modules. For the E-Learning Platform, the main packages are User Management, Course Management, Assessment Management, Payment Management, and Result & Certificate Management. The packages contain related classes such as Student, Instructor, Administrator, Course, Learning Material, Assessment and Quizzes, Payment, Result, and Certificate. Package diagrams make a large system easier to understand, maintain, and develop.
Procedure and Execution (100 Words)	Algorithm(Steps): Step 1: Start. Step 2: Identify the E-Learning Platform case study. Step 3: Identify the main packages in the system. Step 4: Create the following packages: • User Management • Course Management • Assessment Management • Payment Management • Result & Certificate Management Step 5: Add the classes to their respective packages. Step 6: Place Student, Instructor, and Administrator under User Management. Step 7: Place Course and Learning Material under Course Management. Step 8: Place Assessment and Quizzes under Assessment Management. Step 9: Place Payment under Payment Management. Step 10: Place Result and Certificate under Result & Certificate Management. Step 11: Connect the packages using dependency relationships. Step 12: Verify and save the Package Diagram.

Department of Computer Technology

Vision of the Department

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission of the Department

To nurture computer engineering professionals by offering: Dynamic learning environment that encourages problem-solving using emerging technology, · National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration, Holistic, ethical and sustainable development for lifelong success.

	Step 13: Stop. Code: Tool Used: StarUML Output:  The diagram is titled "Package Diagram for the E-Learning Platform". It shows several packages and their relationships: Course Management package contains a Course class (labeled "(from Course Management)"). Assessment Management package contains an Assessment class (labeled "(from Assessment Management)"). User Management package contains three classes: Instructor (labeled "(from User Management)"), Student (labeled "(from User Management)"), and Administrator (labeled "(from User Management)"). Learning Material Management package contains a Learning Material class (labeled "(from Learning Material Management)"). Payment Management package contains a Payment class (labeled "(from Payment Management)"). Result and Certificate package contains two classes: Result (labeled "(from Result and Certificate)") and Certificates (labeled "(from Result and Certificate)"). Relationships (dashed arrows) include: Course Management contains Assessment Management (+contains). Assessment Management contains Course Management (+contains). User Management contains Course Management (+contains). User Management contains Assessment Management (+contains). User Management contains Learning Material Management (+Makes). User Management contains Payment Management (+Pays). User Management contains Result and Certificate (+Gets certificates). Result and Certificate contains Payment Management (+Makes). Result and Certificate contains Assessment Management (+if eligible then generates).
Output Analysis	The UML Package Diagram organizes the E-Learning Platform into logical functional packages. User Management contains Student, Instructor, and Administrator classes. Course Management contains Course and Learning Material classes. Assessment Management contains Assessment and Quizzes. Payment Management contains Payment, while Result & Certificate Management contains Result and Certificate. The dependencies between these packages represent the flow of functionality in the E-Learning Platform. The Package Diagram provides a high-level view of the system and makes the organization of the classes and modules easier to understand.

Conclusion	I have successfully understand the study and diagrammatic flow of UML Package diagram for the given case study of an E-Learning Platform.
Plag Report (Similarity index < 12%)	 The screenshot shows a plagiarism checker interface with three tabs: 'Plagiarism Checker', 'Check Grammar', and 'AI Detector'. The 'Plagiarism Checker' tab is active. It displays 'Scan Properties' on the left: 'Sources Found' (0), 'Words' (208), and 'Characters' (2019). On the right, there are three circular progress indicators: 'Plagiarism' at 0%, 'Exact Match' at 0%, and 'Unique' at 100%. A 'View More Details' button is visible at the bottom left of the scan properties section.
